Objective

As an electronics and electrical engineering student, I am actively seeking a 16-week internship abroad starting in february 2025. This opportunity would allow me to develop my professional skills, gain practical experience in my field, and expand my international network. I am looking forward to contribute to innovative projects, learning from experts, and immersing myself in a whole different culture.

Education

Bachelor Universitaire de Technologie en Génie Électrique et Informatique Industrielle
IUT de l'Indre

Châteauroux, France
Sept 2022 - Current

- A 3-year degree program in Electronics and Electrical Engineering
- Courses:** Power Electronics, Electrotechnics, Motor Control, Control Theory, Pulse Width Modulation Techniques, Automation, Supervision and IoT

Lycée Pierre et Marie Curie (High School)
Baccalauréat

Châteauroux, France
Graduated in 2021

- Passed with Distinction
- Specialised in Physics and Maths

Work Experience

Andritz Separation
Automation Intern

Châteauroux, France
Apr 2024 - Jun 2024

- Wiring design of controls pannels for a training test bench
- Automated and optimised the data handling with an Excel macro in VBA for an ERP system
- Studied the feasibility for a LoRaWAN monitoring project

High School Tutoring
Academic Support

Châteauroux, France
2021 - Current

- Tutoring in mathematics and physics for high school students

University Projects

Electrical Kart Test Bench
IUT de l'Indre

Châteauroux, France
Sept 2024 - Dec 2024

- Design of a power electronics system for a electric kart test bench. Study of electric drives and energy reinjection into the grid

Ball and Beam Control Theory System
IUT de l'Indre

Châteauroux, France
Sept 2023 - Dec 2023

- Development of a Ball and Beam control system utilizing an Arduino board and Matlab Simulink as a digital controller. Implementation of various types of controllers and creation of documentation for educational purposes

Skills

- Languages** French (Native proficiency), English (Professional proficiency)
- Programming** C/C++, Python, VBA, VHDL.
- Automation** Ladder, Structured Text, Grafcet (Siemens TIA Portal, Schneider ControlExpert)
- Soft Skills** Time Management, Teamwork, Problem-solving, Documentation

Interests

- Home Automation** Passionate about developing and integrating smart home automation systems
- Trainspotting** Enthusiastically engaged in trainspotting, with a keen interest in railway systems and their history
- Travel** Passionate about traveling, with a love for exploring new cultures and destinations
- Swimming** Enjoy swimming regularly to stay active and healthy
